

CODIGO PARA CREAR RELACION EN SQL

```
CREATE DATABASE deportes DEFAULT CHARACTER SET utf8 COLLATE utf8_general_ci;
use deportes;
CREATE TABLE deportes(
    id_deportes bigint(12) NOT null AUTO_INCREMENT PRIMARY KEY,
    nombre varchar(75) NOT null
);

CREATE TABLE categorias(
    id_categorias bigint(12) NOT null AUTO_INCREMENT PRIMARY KEY,
    nombre varchar(75) NOT null,
    id_deportes bigint(12)
);

alter TABLE categorias
add constratain pk_fk_categorias foreing key (id_deportes) references
deportes(id_deportes) on update cascade on delete cascade;
```
